

ADD PROFIT WITH WATER FEATURES!

Learn to earn at our 3-day hands-on educational training sessions

WHAT YOU'LL LEARN:

Session 1 focuses on profitable low-maintenance water feature systems that are fast and easy to install – Fountains set in basins, Formal Spillways built into hardscape walls, and Pond-free waterfalls, cascades without the pond. Attendees build examples of all types.

Session 2 concentrates on Water Gardens, from Lily ponds to Koi ponds, pond filtration from skimmers to automatic filters, four season maintenance, advanced pump specification and water treatments. Attendees build a pond incorporating multiple filtration options.

Session 3 explores advanced filtration systems that guarantee crystal clear water in the most demanding applications. Attendees will install multiple filtration systems in a demonstration pond, concentrating on plumbing, powering and remote control of high-end Koi and recreational ponds.

Session 4 targets Water Features for the Hardscaper, from Bowls, Vases and Basalt Columns to Spillways, Spouts and Waterwalls, in a variety of basins to enhance both new and existing Hardscapes. Attendees construct multiple hardscape features, some into existing walls, others freestanding.

All sessions include a comprehensive product overview, estimating water features, specifying pumps & plumbing, and maintenance for profit

WHO SHOULD ATTEND?

Contractors who:

- Want to add an additional profit stream to their business
- Want to learn how to install different water feature types
- Want to understand how to profit from water features
- Want to learn more about the global leader in water features
- Want to have fun while they learn!
