

# PondoVac 4

*Pond and pool vacuum for continuous cleaning and waste discharge*

## Two Chamber System

Fills and empties alternating chambers for continuous suction and gravity discharge of waste water

## 5 Tool Attachments

From flat surfaces to gravel, tools included will help conquer every type of debris and surface

## Hand regulator

For adjusting the suction power, based on water depths

## Debris Collection Bag

Debris is retained in the Debris Collection Bag to filter water if returning to the body of water or into garden beds

## Wheeled Chassis

Wheels ensure stable movement through rough terrain and chassis conveniently carries tubes and tool attachments

PondoVac 4 (50409)

# PondoVac 4

ITEM	48080
DESCRIPTION	PondoVac 4
WATTS	1800
MAX FLOW	1,300 gph
MAX SUCTION DEPTH	8'
CORD LENGTH	14'
DIMENSIONS	15 $\frac{5}{8}$ "L x 16 $\frac{3}{4}$ "W x 26 $\frac{1}{2}$ "H
SUCTION HOSE	16'
DISCHARGE HOSE	8'
TANK VOLUME	5 $\frac{1}{2}$ gal
INCLUDES	4 aluminum tubes, 1 transparent suction tube, 5 suction nozzles, debris collection bag
WARRANTY	2-year

- OASE PondoVac 4 features continuous suction and waste discharge
- Two chamber system fills and empties alternating chambers for continuous suction and gravity discharge
- Can be used for cleaning ponds and pools, as well as a wet vacuum around the home
- Highly efficient suction depth of 8' due to high performance 1800 W motor with optimized blade design
- Suction capacity up to 1,300 gph, depending on the implementation conditions
- Transparent suction tube for easy visual inspection
- Wheeled chassis ensure stable movement through rough terrain
- Adjustable handle and suction tube sockets for fast and convenient transportation of attachments

## Included Nozzles

### Adjustable floor nozzle

This universal nozzle (0.1-0.5") removes pond floor debris without vacuuming up the gravel.

### String algae nozzle

With this nozzle, strands of string algae can be separated and easily removed.

### Wide area nozzle

With rollers, integrated brush and weight for large areas such as in pools. Ideal for general maintenance.

### Brush nozzle

For corners and stubborn debris.

### Wet suction nozzle

Wet suction for indoors and outdoors.
