

ScreenMatic² 39000

Flow through filter with advanced self-cleaning screen

More Efficient Filtration

The height of the outlet has been increased, allowing for more water contact over a greater area of the foams, increased filtration efficiency.

Increased filtration

The dwell time of water in the filter has also been increased, extending filtration time before water bypass occurs.

Updated Filter Housing

The updated filter housing is built to the same standards as the larger ProfiClear Premium Compact-L filter and all replacement parts are available for extended service life.

- Flow through filters with biological and mechanical filtration clean and clear pond water which flows back down to the pond by gravity
- OASE BioTec ScreenMatic² automatically separates debris using the self-cleaning screen, depositing coarse debris into the removable tray
- Adjustable intelligent cleaning sensor mounted above screen detects buildup of debris and automatically empties screen into debris tray
- High efficiency filter system features 3 different densities of foam harboring a variety of beneficial bacteria that remove harmful ammonia and nitrites
- Double-sealed screen motor and reinforced screen material ensure an extended service life
- Foam distribution and optimized water level in the container to provide longer filter service life, improved filtration and reduced maintenance
- Filter foams clean directly inside the filter in pond water to preserve beneficial bacteria colonies and reduce water waste
- Slide valve on sludge drain removes sludge and dirty water with minimal mess
- Add an optional Bitron C UVC clarifier to any ScreenMatic² filter system for enhanced clarity and cleaner water
